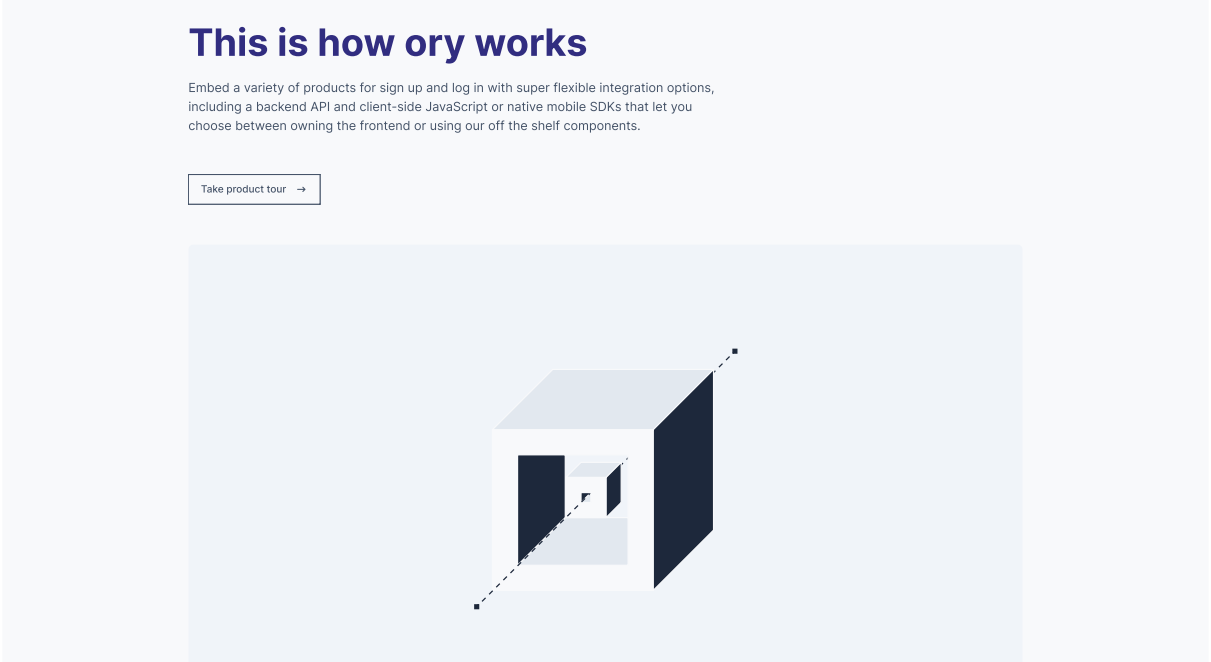
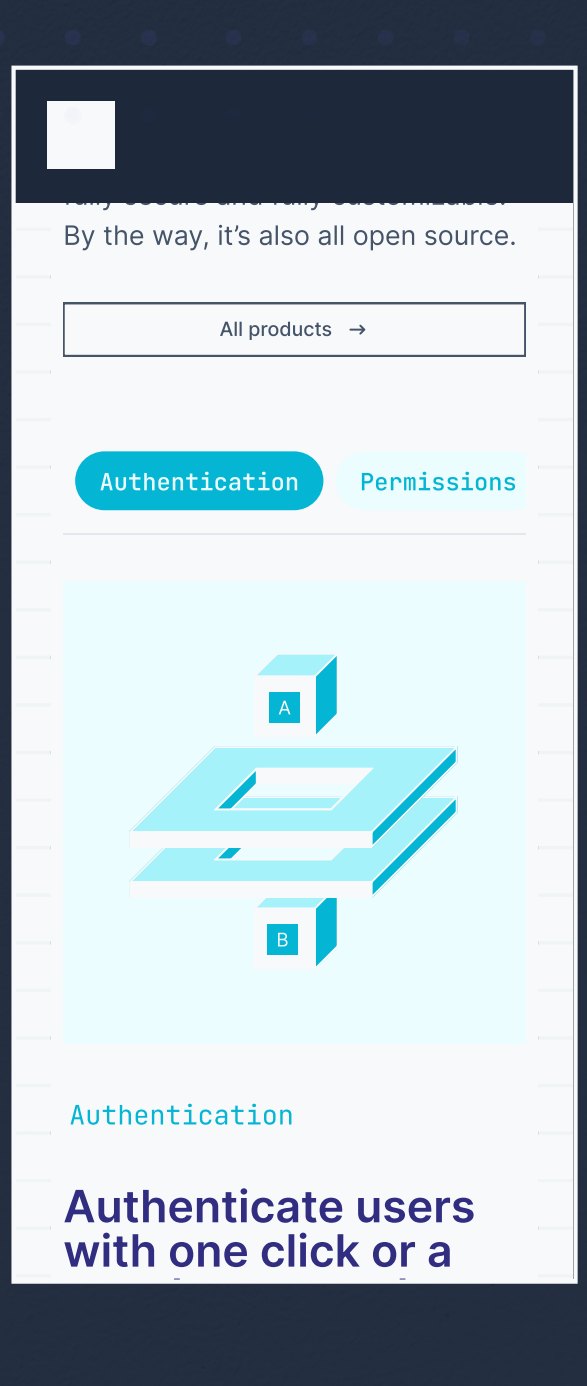
Ory Illustrations



This is how ory works

Embed a variety of products for sign up and log in with super flexible integration options, including a backend API and client-side JavaScript or native mobile SDKs that let you choose between owning the frontend or using our off the shelf components.



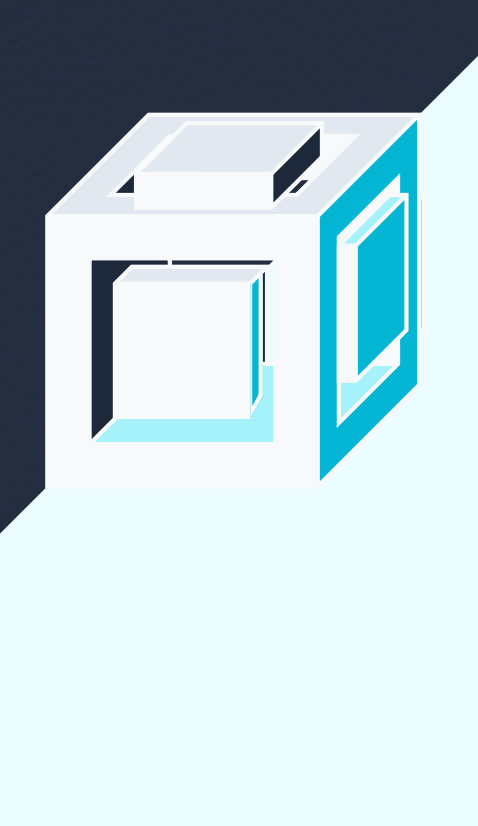
By the way, it's also all open source.

Authentication

Authenticate users with one click or a

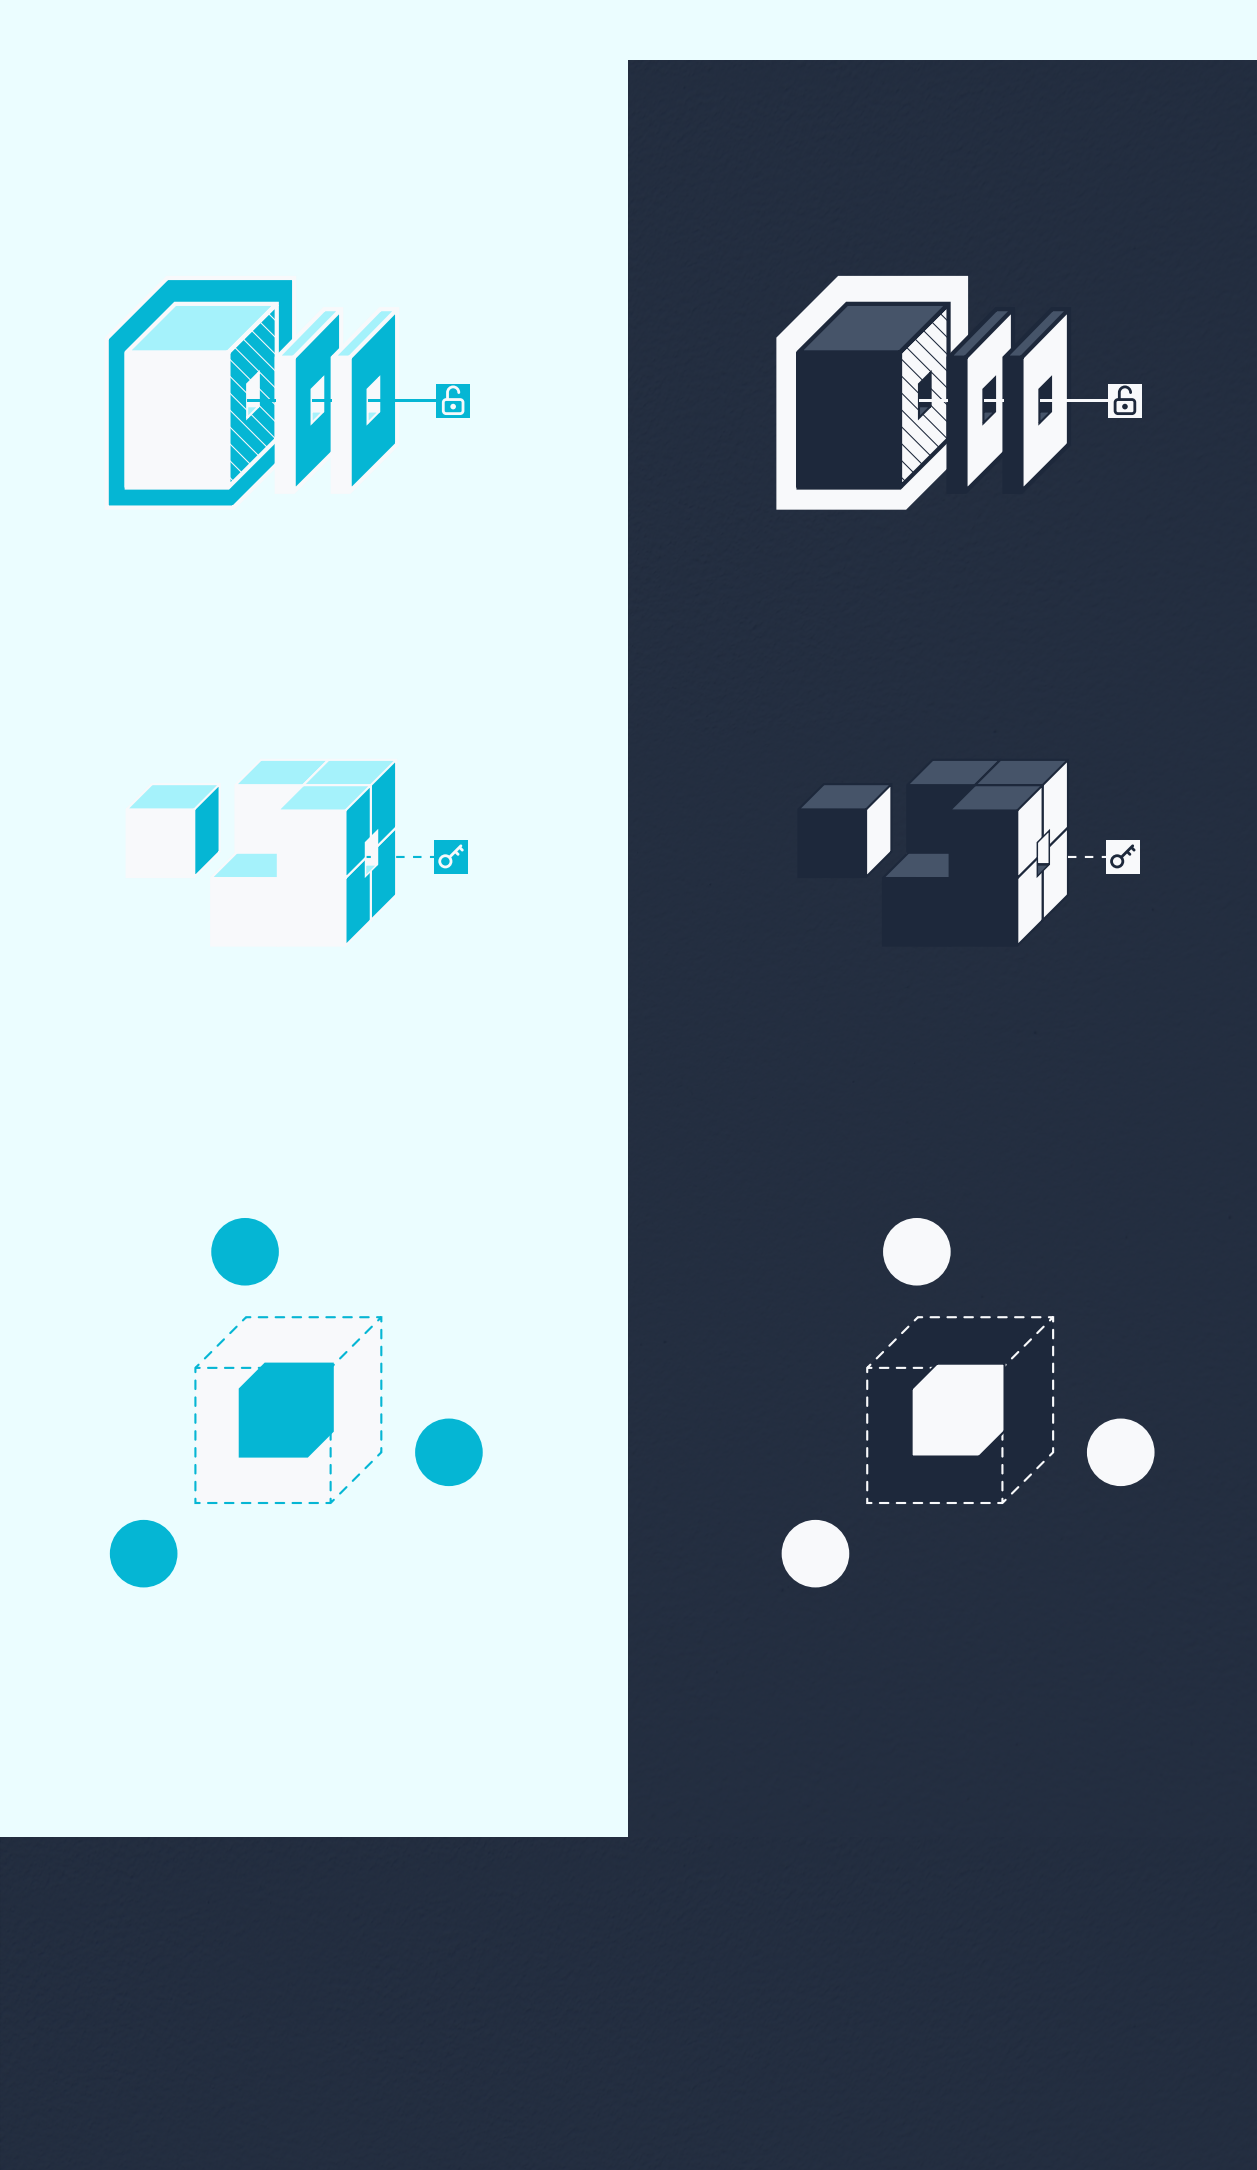
Style direction

The lead designer and I worked on a new style that should reflect technicality along with simplicity.



What I learned

I learned more advanced Figma techniques, design file organization, iterating towards a purpose as well as being able to take critique and improve upon feedback.



01 Biometrics & Passkeys

Flexible solutions that work for your product

Embed a variety of products for sign up and log in with super flexible integration options, including a backend API and client-side JavaScript or native mobile SDKs that let you choose between owning the frontend or using our off the shelf components.

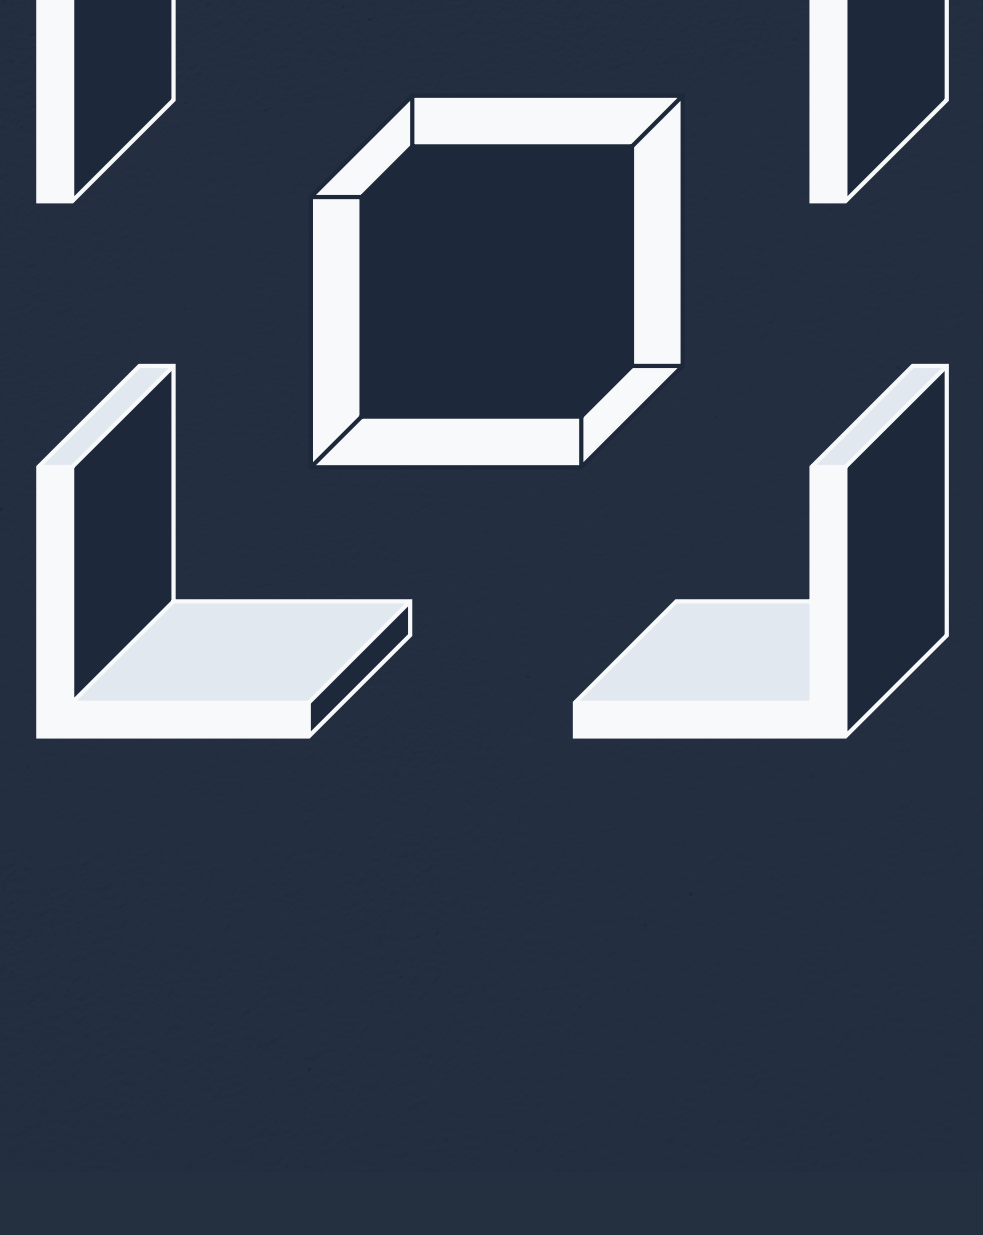
Why Cubes?

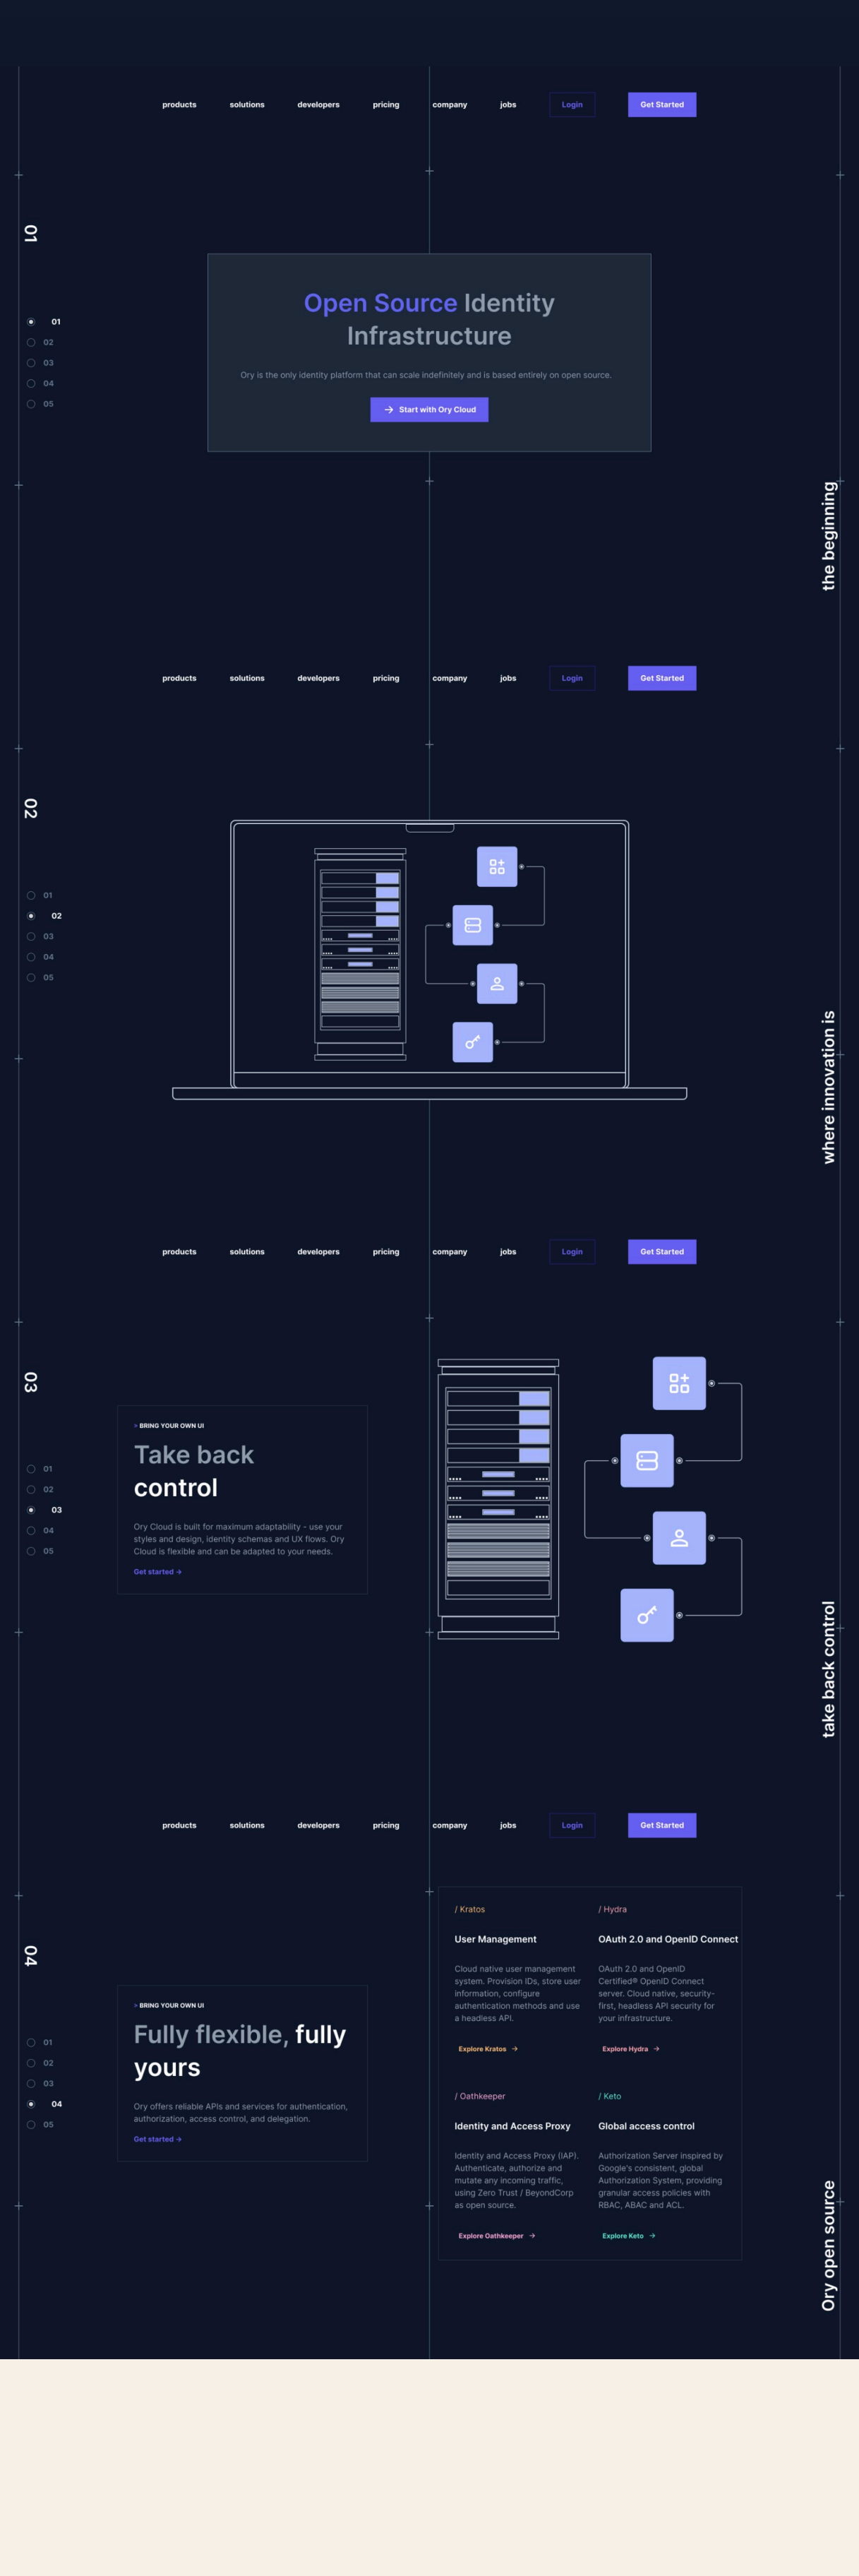
Cubes resemble strength and symmetry. It is also much easier to create variations of a base cube to bring new life to the illustrations.

Benefits

I created variations and segments with digital asset grids that allowed me to also be able to import them into After Effects and create animations for the illustrations when needed.



UI Design



Open Source Identity Infrastructure

Ory is the only identity platform that can scale indefinitely and is based entirely on open source.

BRING YOUR OWN UI

Take back control

Ory Cloud is built for maximum adaptability - use your styles and design, identity schemas and UX flows. Ory Cloud is flexible and can be adapted to your needs.

BRING YOUR OWN UI

Fully flexible, fully yours

Ory offers reliable APIs and services for authentication, authorization, access control, and delegation.

/ Kratos

User Management

Cloud native user management system. Provision IDs, store user information, configure authentication methods and use a headless API.

/ Hydra

OAuth 2.0 and OpenID Connect

OAuth 2.0 and OpenID Certified® OpenID Connect server. Cloud native, security-first, headless API security for your infrastructure.

/ Oathkeeper

Identity and Access Proxy

Identity and Access Proxy (IAP). Authenticate, authorize and mutate any incoming traffic, using Zero Trust / BeyondCorp as open source.

/ Keto

Global access control

Authorization Server inspired by Google's consistent, global Authorization System, providing granular access policies with RBAC, ABAC and ACL.

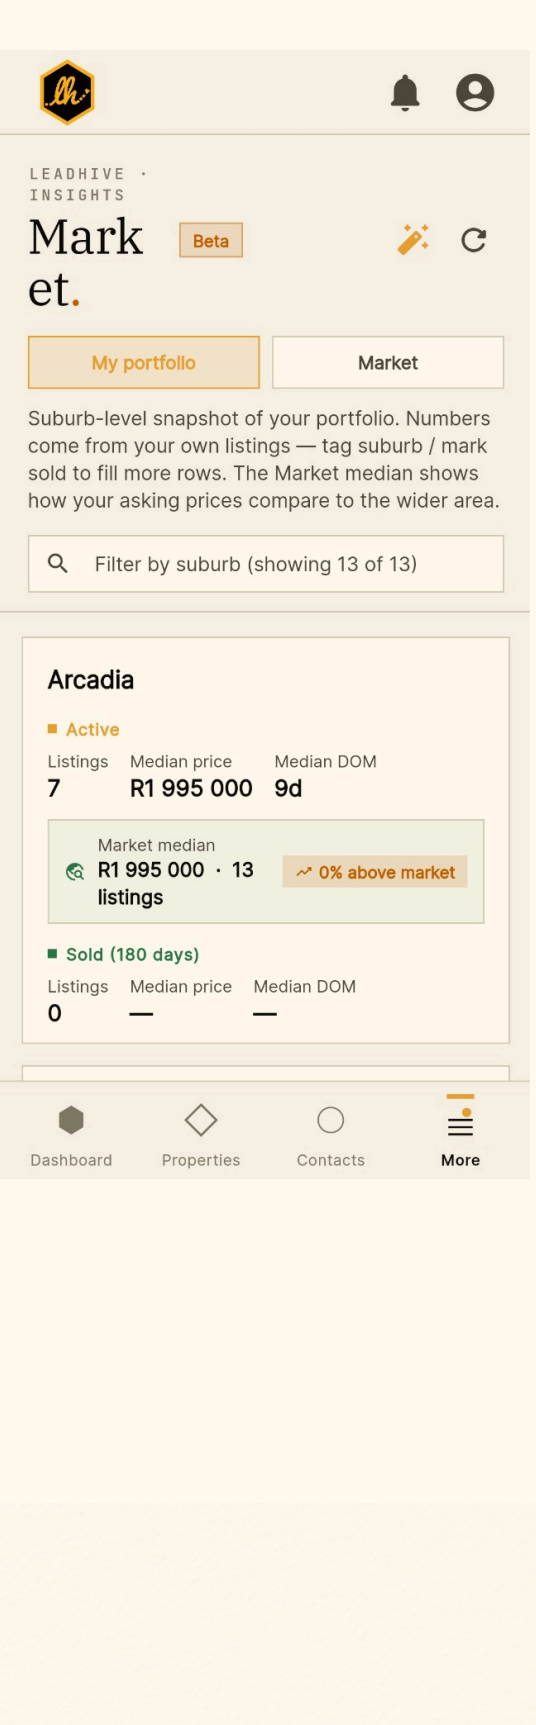
What is LeadHive?

LeadHive is a Real-Estate platform designed and developed by me. The goal is to help agents manage their admin and generate leads for their properties. The platform is live at leadhive.reverdesigns.art



LEADHIVE · INSIGHTS

Market.

Suburb-level snapshot of your portfolio. Numbers come from your own listings — tag suburb / mark sold to fill more rows. The Market median shows how your asking prices compare to the wider area.
